Prepared for corporate clients, manufacturers, retailers, facility managers and project partners.

01 | About KAB Electro Solutions

KAB Electro Solutions focuses on helping businesses manage service and maintenance needs across stores, commercial premises and product-installation projects. Depending on service scope and location, support can include site coordination, technician deployment, installation support, fault diagnosis, maintenance visits and closure reporting.

Our objective

To provide dependable, well-coordinated field service support that helps clients maintain operational continuity, improve customer experience and manage service requirements through a single point of coordination.

How we work

- **Understand the requirement:** Capture product, site, location, urgency and scope details.
- **Coordinate service:** Arrange suitable service resources based on availability and technical requirements.
- **Execute the visit:** Carry out agreed installation, inspection, repair or maintenance work.
- **Report and close:** Share job status and completion details according to the agreed process.

ONE SERVICE COORDINATION PARTNER	MULTI-CATEGORY SUPPORT	CLEAR JOB REPORTING
A coordinated route for service requests, scheduling and follow-up.	Support across selected installation, maintenance and facility-service categories.	Job updates and completion records aligned with client requirements.

02 | Core Service Categories

Store & Facility Maintenance Routine maintenance coordination, breakdown support, site inspections and repair coordination for retail and commercial premises.	Electrical & Plumbing Electrical maintenance, installation work, plumbing support, fixture replacement and site-level fault resolution within agreed scope.
HVAC & Air Conditioning Installation coordination, maintenance visits and breakdown support for supported residential and commercial air-conditioning systems.	Kitchen & Home Appliances Installation and service coordination for supported kitchen and household appliances, including chimneys, hobs, ovens and selected appliances.
Bathtub, Jacuzzi & Sanitaryware Installation support for bathtubs, Jacuzzi systems, sanitaryware, faucets, shower fittings and related plumbing connections, subject to site assessment.	SteamPro & Steam Bath Equipment Provision visits, installation coordination and technical service support for steam machines and related wellness equipment, based on product requirements.
Dental Equipment Installation and maintenance support for selected dental equipment through suitably trained technical resources and manufacturer-aligned procedures.	Glass, Signage & Store Fixtures Coordination for glass and fixture installation, signage lighting, display fittings and selected retail setup requirements.
Civil, Painting & Renovation Minor civil repairs, painting and renovation coordination for stores and commercial premises.	AMC & Preventive Maintenance Scheduled maintenance plans and service coordination based on agreed asset lists, service frequency, coverage and contract terms.

03 | Industries We Support

- **Retail chains & showrooms:** Store maintenance, electrical and fixture support, appliance installation and multi-site service coordination.
- **Manufacturers & distributors:** Product installation, field-service coordination and after-sales support opportunities.
- **Hotels, resorts & wellness facilities:** Bathroom fixtures, steam equipment and selected facility maintenance.
- **Builders & real-estate projects:** Sanitaryware, bathroom installations and selected technical works.
- **Commercial premises:** Offices, business facilities and other sites requiring maintenance coordination.
- **Dental clinics & equipment suppliers:** Selected equipment installation and maintenance, subject to technician capability and manufacturer requirements.

04 | Brand & Service Partnerships

KAB Electro Solutions welcomes discussions with manufacturers, OEMs, retailers, distributors and service aggregators seeking installation, maintenance or after-sales support. Partnership scope can be defined around supported products, serviceable locations, technician requirements, turnaround expectations, spare-parts processes, reporting and commercial terms.

Potential partnership scope

- Product installation and site visits
- Breakdown service and repair coordination
- Preventive maintenance and AMC programmes
- Multi-location store maintenance
- Technician deployment and appointment coordination
- Job status updates, closure reports and escalation handling

LET'S DISCUSS A SERVICE PARTNERSHIP

Share your product category, locations, expected service volume and operating requirements so the right service scope can be discussed.

05 | Service Delivery Approach

1. Requirement Capture service scope, site details and product information.	2. Planning Check availability, skills, parts and visit requirements.
3. Execution Coordinate the agreed site visit or service activity.	4. Closure Record status and completion details as agreed.
